Professional Summary

Computer Science undergraduate and Web & Mobile Application Developer with **2.5+ years of hands-on freelance experience** delivering websites, e-commerce platforms, LMS solutions, and mobile applications for local and international clients. Experienced in **WordPress, WooCommerce, LearnDash, Elementor, custom PHP/plugin development, Shopify, React Native, and responsive development**. Comfortable handling project requirements, UI/UX implementation, integrations, deployment, troubleshooting, and client-driven improvements.

Professional Experience

Freelance Web & Mobile Application Developer

2024 – Present

Direct Clients — Pakistan & International

- Delivered **6+ client projects** across e-commerce, LMS, WordPress, Shopify, and mobile application development through direct referrals.
- Developed and customized WordPress solutions using **PHP, Elementor, WooCommerce, LearnDash, BuddyBoss, HTML, CSS, and JavaScript**, including custom plugin development.
- Independently handled project requirements, **UI/UX, architecture, development, integrations, deployment, troubleshooting, and post-launch updates**.

Selected Projects

EduKing — Online School LMS

eduking.com.au

WordPress, LearnDash, Elementor, BuddyBoss, WooCommerce, PHP, Custom Plugin, Stripe

- Architected and developed a complete **online LMS for an Australian school**, covering user workflows, course delivery, dashboards, responsive UI, and platform customization.
- Designed and developed the **EduKing Core System** custom WordPress plugin and integrated it with LearnDash, BuddyBoss, WooCommerce, and Elementor to implement project-specific functionality.
- Implemented **Stripe payments**, managed hosting and deployment, launched the platform in production, and continue handling client-driven improvements.

HisaabSync — Android Application

React Native, TypeScript, Node.js, REST APIs, MongoDB Atlas

- Developed an Android application using **React Native and TypeScript**, implementing authentication, dashboard interfaces, reusable components, and CRUD-based functionality.
- Worked with **Node.js, REST API communication, and MongoDB Atlas** for application data and backend integration; managed the project using Git/GitHub.

Vox Autos — Automotive E-commerce Platform

voxautos.com

WordPress, WooCommerce, Elementor, PHP, HTML, CSS, JavaScript

- Independently developed and deployed a **live automotive e-commerce platform** for a Pakistani business selling car parts and accessories.
- Implemented product catalogues, category-based shopping, WooCommerce cart and checkout functionality, responsive UI, and client-specific customizations from development through production deployment.
